Experienced Engineering Leader specializing in SRE & Software Engineering (10+ years). Proven success in building and scaling high-performing SRE teams (3 years). Passionate about incident response optimization and cloud-native reliability.

Skills

Python | AWS | Splunk | Docker | Puppet | Ubuntu | Terraform | Kubernetes | CI/CD Pipelines |
Servant Leadership | Technical Mentorship | Incident Management

Certifications

HashiCorp

HashiCorp Certified: Terraform Associate (003)

May 2025

Work Experience

Engineering Manager

Yelp

Oct 2020 – Sep 2023

- Supported a diverse team of SREs with varying levels of experience in a remote environment with a management style rooted in servant leadership. This involved providing career and technical mentorship, offering professional development opportunities, removing operational road-blocks, and fostering a collaborative environment, which directly contributed to 5 promotions within the team
- Oversaw the on-boarding of all engineering teams to a modernized incident response platform and improved data gathering methods for postmortems to enhance the action items generated to be more impactful
- Managed a team roadmap aligning deliverables with organizational goals on a constant basis as well as participating in engineering wide annual planning exercises.
- Managed the lifecycle policy for operating systems across Yelp's infrastructure, ensuring software compatibility with in-support versions of Ubuntu and migrating away from outdated versions

Site Reliability Engineer

Yelp

Apr 2015 – Oct 2020

- Enhanced the consistency and reliability of cloud resources by automating system operations with Puppet, leading to more stable environments, and by migrating resource deployments to Terraform for faster and more predictable provisioning
- Led the successful mitigation and resolution of critical production incidents for Yelp's AWS cloud infrastructure and Python based micro-services while participating in an on-call rotation as well as organizing multi-team/multi-organization mitigation efforts for large-scale production incidents when required
- Supported the infrastructure of acquired companies, facilitating their transition to standard Yelp technologies like Kubernetes, Sensu, Jenkins, AWS EC2, ElastiCache, and Yelp's internal PaaS (PaaSSTA)
- Collaborated with leadership as a tech lead to translate roadmap objectives into actionable projects for the team
- Guided team members as a tech lead, offering technical mentorship through regular 1:1 sessions, code reviews, design documents, project discussions, and daily guidance

Software Engineer

PayPal

Feb 2011 – Feb 2015

- Supported applications and batch processes for PayPal Credit, ensuring proper functionality and monitoring
- Developed troubleshooting tools to address recurring failures in batch processes
- Researched customer issues, implemented fixes directly or collaborated with development teams for resolution
- Participated in 24x7 on-call rotation for responding to production alerts

Developer

Legg Mason

Jun 2008 – Feb 2011

- Supported Straight-Through Processing (STP) applications and processes for trade processing in capital markets and payment transactions
- Collaborated with infrastructure teams to establish internal and external networks for STP application integration
- Automated processes using Autosys, PERL, and Windows batch scripting languages
- Executed maintenance and upgrades on server-based software for STP-related processes

IT Support

St. Mark's High School

Jan 2006 – Jun 2008

- Delivered hardware and software support for 1750 students, faculty, and staff
- Managed installation, setup, and maintenance of OS X and Windows servers at the school
- Maintained functionality of all technology equipment within the building

Personal Development

Gap Year

Oct 2023 – Dec 2024

- Took a planned career break to prioritize personal growth and strengthen relationships with family and friends
- Kept up to date with SRE and Engineering leadership developments through resources like Rands Leadership Slack, udemy courses for terraform and AWS certifications, and leetcode exercises.
- Energized and looking forward to returning to the workforce

Education

B.S. in Computer and Information
Sciences

University of Delaware

2002 – 2006
